

??

AGENT CONVERSATION LOG

??

? You:

test the iflow "wool03" in the package "testmcp" by creating 2 marriage products, list the names.

Routing hint: This request best matches `integration_suite`. Use for iFlow and SAP Integration Suite design/creation/deployment tasks.

??

?? integration_suite__get_iflow_endpoints result:

```

??

? Agent:

The test for the iFlow "wool03" in the package "testmcp" failed due to internal server errors. The main issues observed:

- HTTP 429 errors (too many requests or rate limiting from the target system, likely WordPress.com).
- HTTP 400 errors (invalid JSON body passed, syntax error).

No products were created, and no product names could be listed due to these failures.

****Next steps:****

- Check the iFlow configuration and endpoint payload requirements.
- Ensure the target system (WordPress.com or similar) is not rate-limited and accepts the payload format.
- Review the iFlow error logs for more details and adjust the payload structure as needed.

If you want a detailed error analysis or need to review the iFlow configuration, let me know!

??

Final Answer Summary:

The test for the iFlow "wool03" in the package "testmcp" failed due to internal server errors. The main issues observed:

- HTTP 429 errors (too many requests or rate limiting from the target system, likely WordPress.com).
- HTTP 400 errors (invalid JSON body passed, syntax error).

No products were created, and no product names could be listed due to these failures.

****Next steps:****

- Check the iFlow configuration and endpoint payload requirements.
- Ensure the target system (WordPress.com or similar) is not rate-limited and accepts the payload format.
- Review the iFlow error logs for more details and adjust the payload structure as needed.

If you want a detailed error analysis or need to review the iFlow configuration, let me know!
